

Microsoft Teams Case Study

Broome Real Estate

R-Group assisted **First National Broome Real Estate** with the deployment of a Unified Communications Platform.

With users based in remote locations, a hosted Microsoft Teams platform was deemed to be the best solution for the company. The UC platform allows for efficient communication and collaboration between multiple sites through full telephony capabilities as well as instant video and voice conferencing, content sharing and instant messaging.

- Microsoft Teams UC Platform Deployment
- Provision of Office365 Licensing
- Deployment of Desk Phones and Soft phones for staff

"The Microsoft Teams System is very user friendly and easy for our new staff members to learn. We have also found that moving away from our old handsets to headsets has also been a big improvement to our company in being able to be hands free."

~ Charmaine Snow, Principal
