

Teams Meeting Rooms

Revolutionise your meetings and productivity with the power of collaborative technology.

In today's hybrid workplace, businesses have adapted their meeting spaces to accommodate both in-person and remote attendees.

Microsoft Teams Rooms offers a solution that allows users to join meetings from anywhere, schedule and start meetings effortlessly, and collaborate effectively with remote participants, even if they are not part of the same organisation. This solution enhances meeting environments with improved audio and video capabilities, easy content sharing, and intelligent features like real-time transcription and translation.

Microsoft Teams Rooms solutions are designed for various meeting spaces, from small huddle rooms to large conference areas, to create an inclusive meeting experience tailored for the hybrid workplace. Customers can ensure an optimised meeting experience by selecting certified audio or video devices with a native app built for Teams.

WHAT IS MICROSOFT TEAMS ROOMS?

Microsoft Teams Rooms offers a comprehensive video conferencing solution designed to simplify meetings, enhance productivity, and enable digital collaboration.

It provides purpose-built calling and meeting solutions for a complete Teams meeting experience, incorporating high-definition audio and video with certified hardware from various providers. Teams Rooms integrates seamlessly with microphones, cameras, and touch displays to create an immersive and user-friendly experience. Notably, its one-touch join feature is convenient for organizations already using Microsoft Teams.

Teams Rooms is designed to improve Teams meetings in different spaces, from small huddle rooms to large conference rooms, focusing on inclusivity and a user-friendly collaboration experience. This ecosystem of connected devices, combined with the Teams app, transforms any meeting room into an inclusive and accessible collaboration space, ensuring active participation from participants regardless of their location.

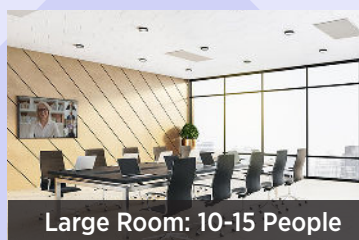

Huddle Room: 2-4 People

Small Room: 4-6 People

Medium Room: 6-9 People

Large Room: 10-15 People

X-Large Room: 15+

One-touch join

Join a meeting quickly and easily with a single touch.

Proximity features

The Microsoft Teams client on your PC and mobile has a proximity sensor that detects the room and can discover and add nearby available Microsoft Teams Rooms to any meeting.

Whiteboard

Leading-class digital whiteboard experience where users “ink together”, using their own touchscreen devices like a PC, tablet or smartphone.

Multi-platform compatibility

Seamless communication between internal teams and external parties.

Intelligent cameras

Improve and elevate the experience of all participants in a Teams Room by utilizing AI-driven active speaker tracking technology that automatically identifies the person speaking.

Central Management

Fully manage and keep devices up to date, and ready to go in Teams Admin Center and enable 24x7 proactive management from Microsoft with Microsoft Teams Rooms Premium.
